

A Note from General Drift

The season of the rising moon has begun: darkening skies, long shadows, fires again warm the hearth. The kiva calls in the spirit's summer harvest. The lodge is re-candled. Come in. Shut the world behind you. Circle around the drum, our body, our planet, the form that for a fleeting moment captures the formless.

Gratitude to the noble and happy wood cutters, splitters and stackers who cut, split and stacked (hence the names) all that wood: John Sumrall, Didier Gincig, Michael Greenberg, John Clancy, and Joe Goodrich. You earned more than blisters that day!
